POSTERS AND TOOLS TRACK

Requirements Engineering (RE) is a dominant factor that influences the quality of software, systems and services. The REFSQ working conference series is well established as one of the leading international forums for discussing RE and its many relations to quality. The special theme of REFSQ'17 is "My RE" to emphasize an important issue: how can RE evolve to deal with growing diversity in systems, still keeping its objective: understanding what is the right software system and helping developing it in the right way.

REFSQ'17 also includes a forum to present posters and demonstrate tools covering any aspect of RE. It gives researchers the chance to present their most recent work and obtain early feedback on ongoing research. Posters may cover any topic in scope of the conference and should present (progress towards) a scientific result and should not be advertisements for commercial products. While posters need not describe completed work, they should at least present some preliminary results. The tools track provides researchers as well as practitioners with the opportunity to show how they support and enable the use of requirements solutions in practice, making the solutions more usable and useful. We encourage to discuss experiences and lessons learned when using the tool in practice.

Poster Presentation
In addition to the poster session, the posters will be on display in the coffee hall outside the REFSQ'17 lecture rooms. There will also be brief and informal presentations of the posters. Well-crafted posters will present the work well by themselves, but authors of posters are encouraged to be available to describe and discuss their work during coffee break. The poster dimension will normally be A0 portrait, with poster content mounted on rectangular poster board that we will provide.

Tool Demonstration
Tools will be presented at desks using your own laptop and screens provided by the REFSQ organizers.

Submissions
For the submission, the general REFSQ submission guidelines apply. Submissions are limited to 4 pages in LNCS format. At least one of the authors must be registered at the conference and present the poster or tool, in order to have the work published in the proceedings. Poster and tools papers will be published in proceedings at CEUR.

Submit via EasyChair at https://www.easychair.org/conferences/?conf=refsq2017.

Posters and Tools Co-Chairs

- Fabiano Dalpiaz – Utrecht University, Netherlands
- Patrick Mäder – TU Ilmenau, Germany

Programme Committee

- Fabiano Dalpiaz – Utrecht University, Netherlands
- Patrick Mäder – TU Ilmenau, Germany
- Raian Ali – Bournemouth University
- Tom-Michael Hesse – Universität Heidelberg
- Jennifer Horkoff – City University London
- Eric Knauss – Chalmers University of Technology
- Elda Paja – University of Trento
- Shiva Nejati – University of Luxembourg
- Michael Vierhauser – Christian Doppler Lab
- Patrick Rempel – TU Ilmenau
- Olga Boruszewski- Leibniz Universität Hannover
- Mehdi Mirakhorli – Rochester Inst. of Technology
